**Apex Mobile Locksmiths** established in 1986 provides a range of expert locksmith services throughout Blackpool, Preston, Lytham St Annes, Thornton-Cleveleys, Fleetwood, Poulton Le Flyde, Garstang and all surrounding areas. We are one of the only locksmith companies in the area that can supply and fit the very same day that we receive your call. We provide a number of services to both domestic and commercial clients and we are fully insured, accredited and DBS checked for your peace of mind.

Our unrivalled experience within the locksmith industry means any works we carry out is done to the highest standard with minimum fuss, mess and disruption to your day. We carry a large stock in our van which means that **we are able to complete 99% of jobs on the very first visit without having to go out to buy additional parts.** It is important to us that we use high quality, branded locks that meet British Standards BS3621 or TS007, to ensure your property has the highest security possible to protect your home, family and belongings.

**Apex Mobile Locksmiths** provides an honest, friendly and professional locksmith service throughout **Blackpool and the surrounding areas.** We will never charge a call out fee and we do not charge VAT which saves you 20% on any works we carry out compared to many other locksmiths in Blackpool and the surrounding towns and cities.

As we are a family local locksmith service in Blackpool we do not use a call center to man our phones so when you contact us you will always get through to a reputable locksmith who will be able to give you guidance and an accurate quotation over the phone before we attend the property. In some cases, we may need to attend the property to diagnose an issue before we are able to quote. If this is the case, we will ensure you are fully aware of any costs involved before we start any work. This is how we ensure we are fully transparent with our pricing and ensure that every customer of **Apex Mobile Locksmiths** is 100% satisfied before we leave after completing any works.
