Our Specialties

Masonry Repointing

This is a process that resolves masonry damage issues. As a chimney is battered by wind, rain, snow, and temperature changes, the mortar that holds the bricks or stones together can crack, chip, and disintegrate . These small cracks and chips can cause big problems if left unchecked. Luckily, it's a rather small repair process if caught early , and our masons have the talents to do the work right! Your chimney will look nearly as good as new once we are finished! Read more about re-pointing
